FIFA World Cup 2026 - Predictions Report

Generated: 2026-06-04 14:33

How accurate is this model?

The model was trained on 8,273 international matches (2000-2026) and tested on games from 2017 onward.

51%

Overall Accuracy
vs 33% random baseline

81%

High-Confidence Accuracy
on 37 matches marked [HIGH]

65%

Large Elo-Diff Accuracy
on 290 one-sided matches

How to read this report

For each group you will find three sections:

1. PREDICTED STANDINGS - which teams are most likely to qualify, based on 10,000 simulated group stages.
2. MATCH PREDICTIONS - each match shows the predicted result in plain language:
WINS / DRAW, the most likely exact scoreline, expected goals (xG), and a confidence label.
3. STATISTICAL DETAIL - full probability breakdown for those who want the numbers.

Confidence labels:

[HIGH] >70% probability on the predicted outcome. The model is most reliable here.

[MED] 60-70% probability. Good signal but some uncertainty.

[LOW] <60% probability. The model sees the match as competitive or hard to call.

Important: predictions are probabilities, not certainties. Football always surprises.

Technical summary

Training: 8273 matches | Models: RF + XGB + LGBM + CatBoost + Elo (weighted voting) | Calibration: temperature scaling T=0.75

Tuned: Yes | Recency weights: Yes | Log-loss: 1.0027 | Test period: 2017-03 to 2026-06

GROUP A
